

Contexto Internacional De La Estandarización e Interoperabilidad En Salud

Estrategias y Beneficios de las funcionalidades de estándares e Interoperabilidad para los países en desarrollo

Nov 21, 2013, Bogotá Colombia

Armonización y la interoperabilidad de datos y sistemas

Harmonization and Interoperability of Data and Systems

WHO Forum on Health Data Standardization and Interoperability

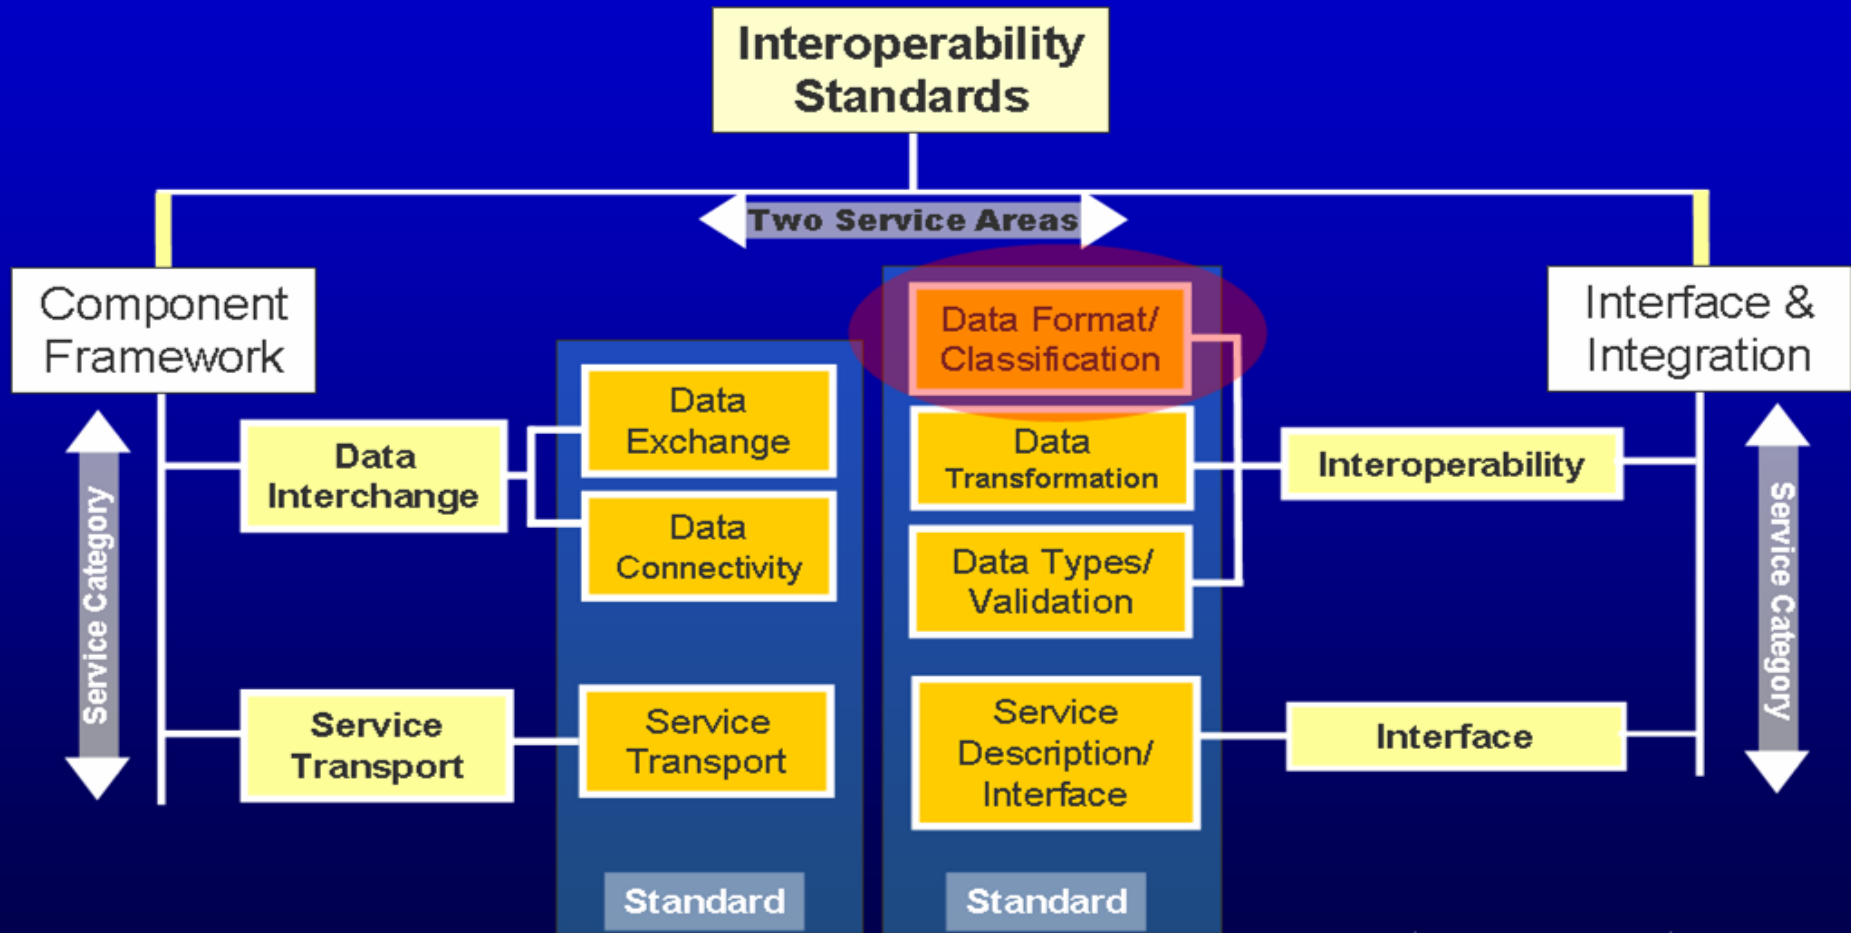

3–4 December 2012
Geneva, Switzerland

Acknowledgement	ii
Executive summary	1
Background	3
Rationale for convening the forum.	3
Preparations for the forum.	4
Organization of the forum	4
Opening remarks	5
Panel sessions.	6
Panel 1. Essentials of health data standards for health care delivery	6
Panel 2. Country perspectives on health data standards implementation	7
Panel 3. Access to health data standards	8
Panel 4. In-country policy and governance mechanisms for health data standards adoption	9
Panel 5. Innovative funding models for health data standards access and adoption	10
Panel 6. Human capacity for health data standards implementation and maintenance	11
Panel 7. Role of development partners in health data standards implementation	11
Moving forward	13
Annexes	14
Annex A – Agenda	14

Interoperability and Standards

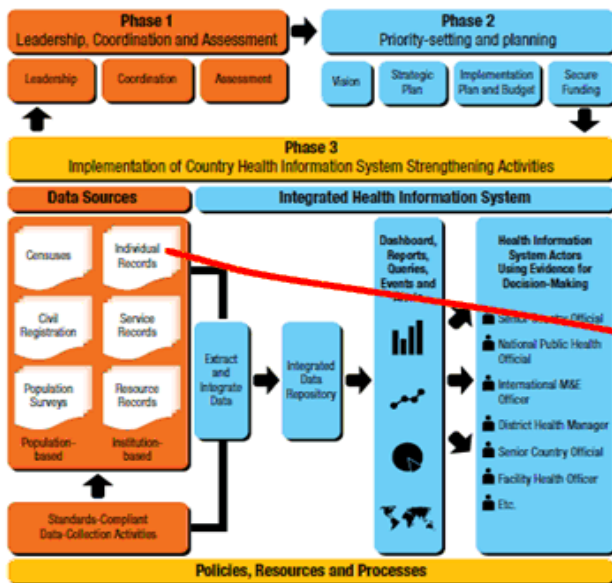

Interoperabilidad y Normalización

El marco, la Arquitectura y las normas

Framework, Architecture, and Standards

HMN Framework

Example eHealth Architecture: ISO TR 14639

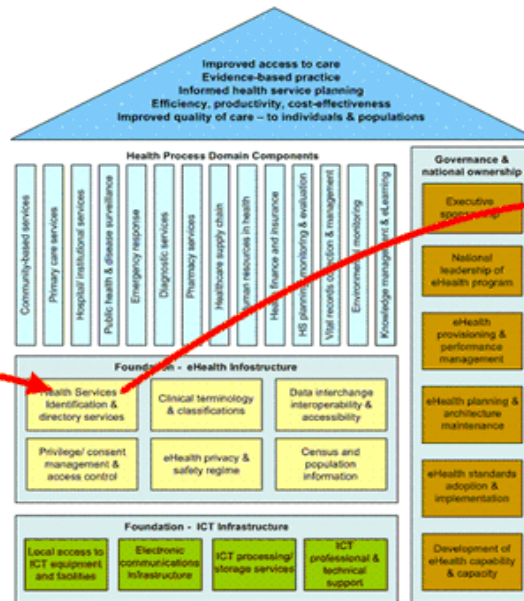

Figure - Potential requirement areas for consideration when developing an eHealth enterprise architecture (adaptation of Rwanda model)

Standard

Una necesidad de acercamiento sistemático para su diseño,
implementación y administración

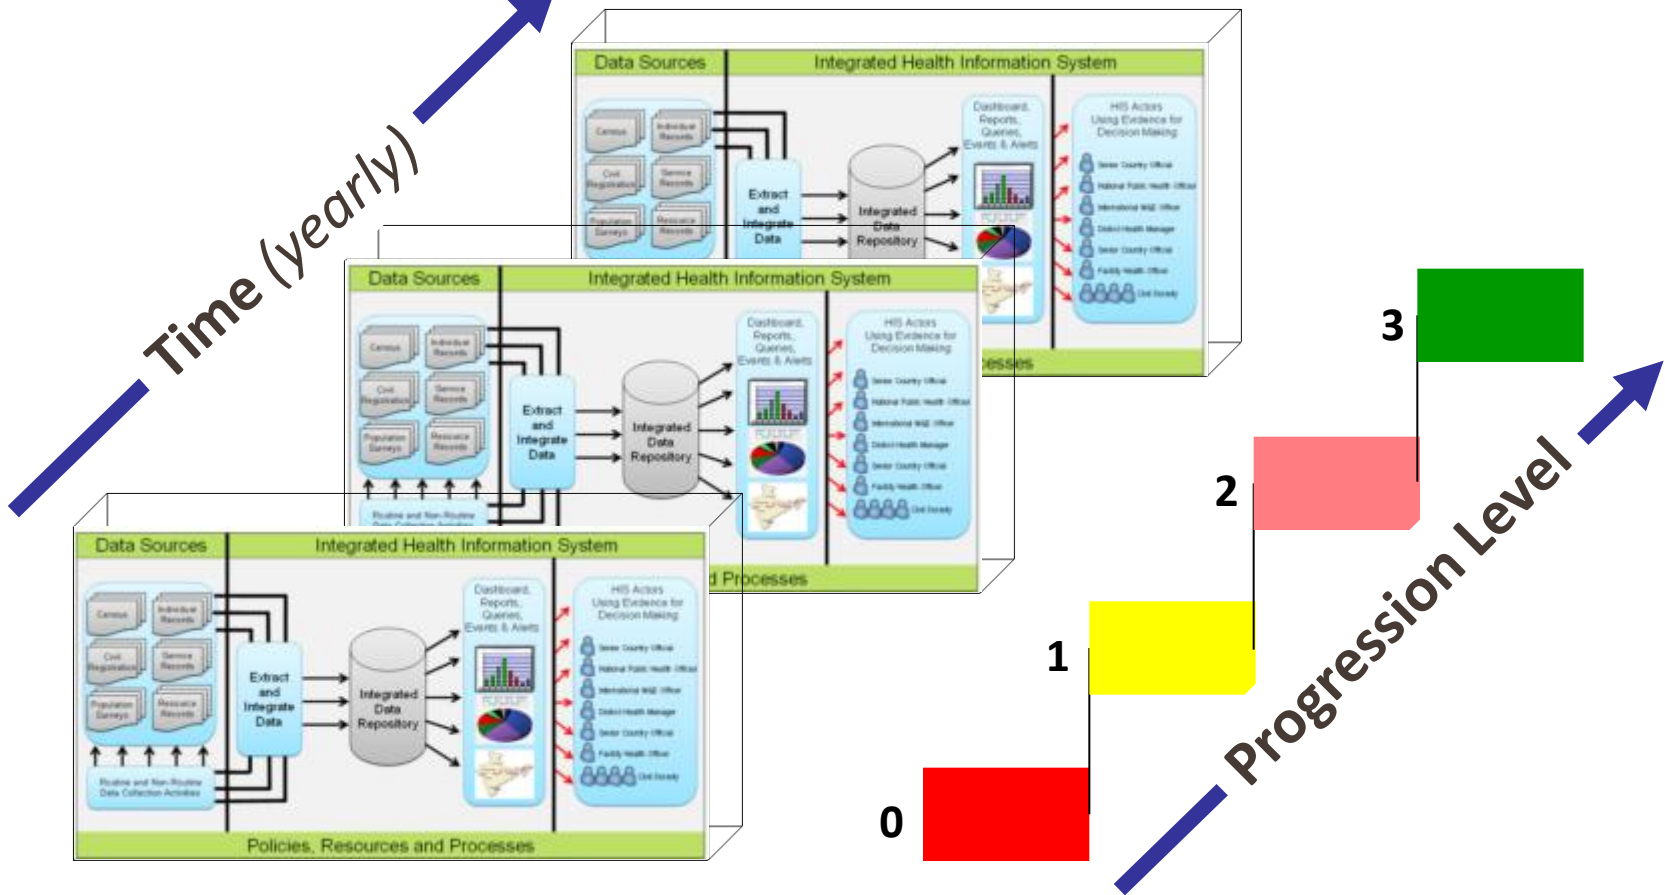

A need for systematic approach to HIS design, implementation, and management

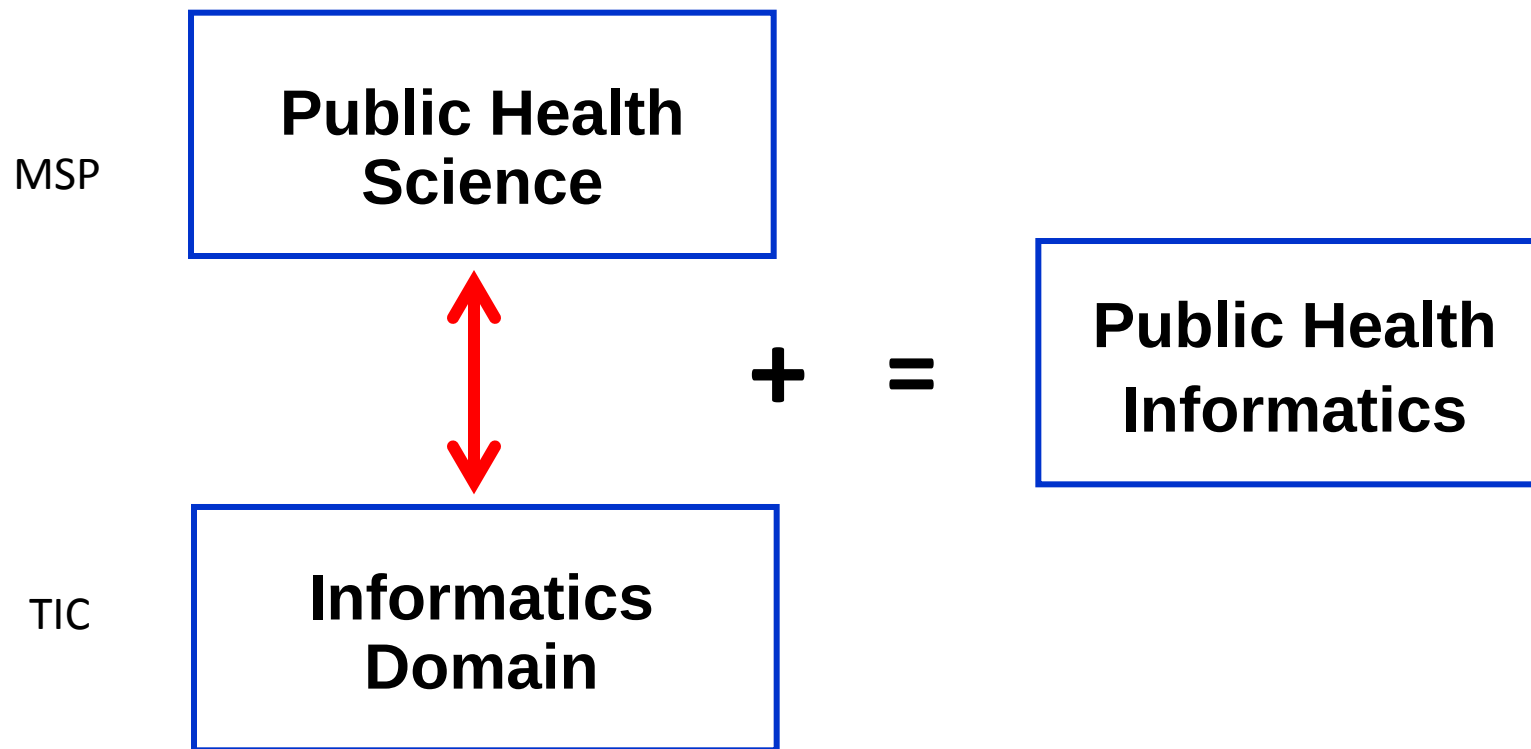

Medir su progreso en tiempo

figura que representa a los países en varios niveles de su madurez

Measuring HIS Progress Over Time

Figure depicting Countries at Various Levels of HIS Maturity

Adopción de las mejores prácticas de ambos dominios

Adoption of best practices from both domains

La estandarización de los datos y la OMS

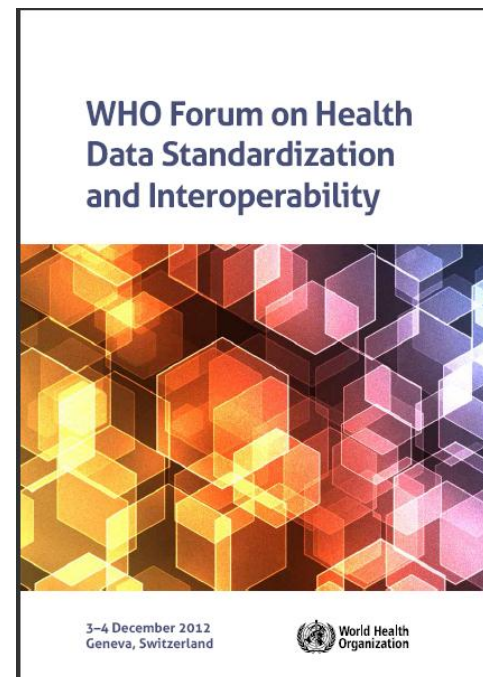

Data Standardization and WHO

- Asiste a los Estados miembros a través de convocar y coordinar la adopción de estándares de eSalud en los niveles nacionales y subnacionales
- *Assists Member States through convening and coordinating the eHealth standards adoption at national and sub-national levels*
 - ofrece asistencia técnica a los países en desarrollo de arquitectura, políticas marcos relativas a la normalización y la implementación
 - *Offers technical assistance to countries in developing architecture, standards-related policy frameworks, and implementation*
- Formación de la ONU Workgroup interagencial sobre la estandarización de datos de salud
 - *Formation of U.N. Interagency Workgroup on Health Data Standardization*

Trabajo en proceso OMS

Work In Progress WHO

- Manual de OMS
sobre
normalización de
datos en salud e
interoperabilidad
- *WHO Handbook on Health
Data Standardization and
Interoperability¹*
